Junior Engineer - Permanent

General

Formal Position:	Junior Engineer
Department:	Engineering
Reports to:	Engineering Manager
Region:	Edmonton, Alberta
Employment Form:	Full-time
Education Level:	Bachelor's degree
Contract Form:	Permanent

Job Description

Mammoet is looking for task-oriented and enthusiastic individuals to join our team in the Edmonton region. Our positions offer the opportunity to develop industry-specific skills and grow your career. Working with Project Engineers and reporting to the Engineering Manager, the Junior Engineer provides technical direction to Mammoet projects through the preparation of critical lift, heavy transport and jack & slide execution drawings, calculations and procedures in accordance with Mammoet and client policies.

Responsibilities will vary depending on the department but may include:

- Using your expertise to develop best-in-class engineering solutions for heavy lifting and transportation projects
- Working with both conventional methodologies and developing new approaches
- Developing drawings, calculations, visualizations, manuals, risk assessments and other key documents
- Ensuring efficient execution that delivers the right results for the customer

Education & Experience

- Experience in engineering operation practices and systems, Heavy lift and transport equipment, industry relevant codes and standards
- English, fluent proficiency verbal and written
- Evidence of experience in a similar role, ideally in any/some of the following sectors: civil engineering, construction, renewables, oil and gas, offshore, ports and mining, is preferred
- 0-3 years of relevant work experience
- A bachelor's degree in Mechanical or Civil/Structural Engineering
- Eligible for registration with APEGA as Engineer-in-Training

Characteristics of a Successful candidate:

- Problem solver
- Ability to work under pressure
- Professional and independent worker
- Excellent communication skills
- Effective time management skills
- Multi-task orientated
- Client service-focused

About our Company

Mammoet helps clients improve construction efficiency and optimize the uptime of plants and installations. For that purpose, we provide solutions for lifting, transporting, installing and decommissioning large and heavy structures.

Our services are focused on the petrochemical and mining industries, civil engineering, power generation and offshore projects. The logistic challenges in these industries are growing daily. Factors such as remote locations, harsh climates and a strong emphasis on the environment are constantly driving us towards smarter and safer solutions.

We provide the following services:

- Engineered lifting and transportation services
- Lifting, transportation and installation of modular constructions

- Factory-to-foundation projects
- Plant turnaround logistics
- Salvage and wreck removal
- Decommissioning of onshore and offshore installations
- Trading in new and used equipment worldwide

For over two hundred years, we've been known for the unique capability of our state-of-the-art equipment. But it's the trust of our clients that has brought us where we are today. Their confidence inspires 5,000 Mammoet professionals to give it their all each day and truly make a difference in projects all over the world.

About our region

This will be a temporary position operating out of Edmonton office and local sites working Monday to Friday with possible rotational shift requirements. The various sites at which we work are within Edmonton city limits. The successful candidate must have his or her own transportation.

Benefits

Salary will be commensurate based upon education and experience. Mammoet offers competitive wages, travel incentives, health benefits and RRSP contributions. In addition to this, we offer an engaging environment in which a variety of career development and growth opportunities exist to our employees both locally and internationally. Mammoet is an existing benefactor for variety of local and national charity organizations and also provides support for our own employees' extracurricular activities. To view our Human Capital Values, please visit our careers website at www.mammoet.com/en/jobs.

To Apply

Interested candidates may submit their resumes and salary expectations directly to the job posting following the below link or by visiting www.mammoetvacancies.com:

Mammoet is dedicated to building a workforce that reflects diversity. Mammoet encourages applications from all qualified individuals. We thank all applicants for their interest in Mammoet, however we will only contact those selected for an interview. Applicants who require accommodation due to disability during the selection process should notify human capital when contacted for an interview.
